As technology makes the world more accessible, students need exposure to social, political, environmental, and health issues of global significance. Each anthology delivers contemporary views on the featured issue with much of the material reflecting stances of countries other than the United States. Primary sources, including speeches and government documents, join essays from international magazines and news sources for a truly panoramic view. Features include: Viewpoints selected from publications and sources around the world offer students a global perspective on pressing issues. Critical-thinking questions guide students in continued consideration and analysis of the topics. Thematic chapters simplify and summarize key aspects of topics into comprehensible information.

This book on Restorative Discipline Practices (RDP) will provide anecdotes and process stories by authors from diverse backgrounds including: classroom teachers, school administrators, campus coordinators, juvenile justice officials, community leaders and university professors. It will be an inspiration and reference for educators as they begin or continue to implement RDP in the schools.

The Texas love affair with highschool football has been going on for years and grows more passionate with each year.

Adding It Up explores how students in pre-K through 8th grade learn mathematics and recommends how teaching, curricula, and teacher education should change to improve mathematics learning during these critical years. The committee identifies five interdependent components of mathematical proficiency and describes how students develop this proficiency. With examples and illustrations, the book presents a portrait of mathematics learning: Research findings on what children know about numbers by the time they arrive in pre-K and the implications for mathematics instruction. Details on the processes by which students acquire mathematical proficiency with whole numbers, rational numbers, and integers, as well as beginning algebra, geometry, measurement, and probability and statistics. The committee discusses what is known from research about teaching for mathematics proficiency, focusing on the interactions between teachers and students around educational materials and how teachers develop proficiency in teaching mathematics.

Classroom management is a topic of enduring concern for teachers, administrators, and the public. It consistently ranks as the first or second most serious educational problem in the eyes of the general public, and beginning teachers consistently rank it as their most pressing concern during their early teaching years. Management problems continue to be a major cause of teacher burnout and job dissatisfaction. Strangely, despite this enduring concern on the part of educators and the public, few researchers have chosen to focus on classroom management or to identify themselves with this critical field. The Handbook of Classroom Management has four primary goals: 1) to clarify the term classroom management; 2) to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers' managerial tasks; 3) to bring together disparate lines of research and encourage conversations across different areas of inquiry; and 4) to promote a vigorous agenda for future research in this area. To this end, 47 chapters have been organized into 10 sections, each chapter written by a recognized expert in that area. Cutting across the sections and chapters are the following themes: \*First, positive teacher-student relationships are seen as the very core of effective classroom management. \*Second, classroom management is viewed as a social and moral curriculum. \*Third, external reward and punishment strategies are not seen as optimal for promoting academic and social-emotional growth and self-regulated behavior. \*Fourth, to create orderly, productive environments teachers must take into account student characteristics such as age, developmental level, race, ethnicity, cultural background, socioeconomic status, and ableness. Like other research handbooks, the Handbook of Classroom Management provides an indispensable reference volume for scholars, teacher educators, in-service practitioners, and the academic libraries serving these audiences. It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management.

An authoritative guide for improving teaching, learning, and literacy in content area classrooms This book introduces teachers to the Disciplinary Literacy instructional framework developed by the Institute for Learning, University of Pittsburgh. Grounded in the Principles of Learning developed by acclaimed educator Lauren Resnick, the framework is designed to prepare students, grades 6 and up, to master the rigorous academic content learning required for college success. Unlike 'generic' teaching models, the framework is specifically tailored for each of the content disciplines. Highly practical, the book shows teachers how to integrate literacy development and thinking practices into their routine content instruction, with separate chapters devoted to math, science, history, and English/language arts. The book also shows how school instructional leaders can support teachers in learning and using this instructional approach. Offers an innovative approach for improving literacy, thinking, and content learning in secondary students Includes detailed instructional guidance plus numerous classroom examples of lessons, dialogs, and teaching routines Features chapters on each of the content areas-math, science, language arts, and social sciences Provides leadership guidance in implementing the method Foreword written by internationally acclaimed educator and cognitive scientist Lauren Resnick

With his mother's help, RJ learns that his problems happen because he doesn't listen or pay attention to directions from her, his school principal, teachers, or even his friends. Author Julia Cook's book shows RJ as well as all K-6 readers the steps to the fundamental social skills of listening and following instructions. When RJ learns to use these skills the right way, he has the best day of his life! This book is the first in the BEST ME I Can Be! series to teach children social skills that can make home life happier and school more successful. The book includes tips for parents and educators on how to effectively teach listening and following instructions skills to kids.

Introduces the equipment and skills needed for painting in oils

.."not because we didn't like the British, but we love Freedom better. I think all of us have the right to be free." Daw Aung San Suu Kyi, a political prisoner of 15 years in her homeland of Myanmar, said these beautiful words to a very privileged audience of British Army Officer Cadets, and staff, at the Royal Military Academy Sandhurst (RMAS) on Friday 26th October 2013. This lady had been awarded the Nobel Peace Prize in 1991, "for her non-violent struggle for democracy and human rights." Her message was very well understood, and received. She delivered an inspirational speech praising the concept of freedom which was eagerly heard by those present, who serve to lead, in a non-political army which defends the right to freedom. A noble cause, indeed. Many have, and will, serve in United Nations missions, under UN Charter which enshrines self-determination. In the audience were many young Scots, some from our Universities Officer Training Corps based in Glasgow, Edinburgh, St Andrews, Dundee, Stirling and Aberdeen. The location and audience were at the very heart of the British Empire, and her opening words above, weren't lost on me during the months before Scotland's first Independence Referendum in 2014. The thought percolated in my mind afterwards, "What if Scotland votes yes to freedom which London then rejects? Would this military audience enforce a political decision from their Westminster government to suppress freedom?" This book, of fiction, was born In June 2017, extremely disturbingly, the UK government appointed the leader of the reactionary right-wing British nationalists in Scotland to a military role with the rank of colonel cancelling immediately the status of a non-political UK army which Daw Aung San Suu Kyi admired. Aung San, father of Daw Aung San Suu Kyi, formed a revolutionary army in December 1941 to overthrow imperial British rule in their colony of Burma. His paymasters were the Imperial Japanese Army but in 1944, ..the British Government announced its intention to grant self-government to Burma within the British Commonwealth... [we discussed] the best method of throwing the Japanese out of the country as the next step toward self-government." Burma became independent on 4 January 1948, but not before the exploited Aung San was murdered by British weapons fired by Burmese collaborators, manipulated by the British, in July 1947 when it became apparent that he wanted full independence for his country, not merely dominion status. La perfide Albion. The inspiration for the fictitious Lieutenant Colonel Sean McAlpin in Free Scotland was found. The ethnic cleansing currently taking place against Rohingyas (in former Burma, now Myanmar) is being carried out by Myanmar military. After 2016 elections parliamentarian, "Than Aung Soe opined: "We will try step by step to reduce the military percentage." Yet doing so will require either the military's consent or a true revolution. And no one should count on the former: ...military commander-in-chief Gen. Min Aung Hlaing emphasized the importance of the Tatmadaw [army] retaining its "leading role in national politics." Are Rohingyas entitled to self-determination from military rule? This book of fiction states all peoples are entitled to self-determination, especially, in the face of military dictatorship.
