The2009InternationalWorkshoponAgentsandDataMiningInteraction(ADMI 2009) was a joint event with AAMAS2009. In recentyears,agents and data mining interaction (ADMI), or agent mining forshort,hasemergedasaverypromisingresearch?eld. Followingthesuccessof ADMI 2006 in Hong Kong, ADMI 2007 in San Jose, and ADMI 2008 in Sydney, the ADMI 2009 workshop in Budapest provided a premier forum for sharing research and engineering results, as well as potential challenges and prospects encountered in the synergy between agents and data mining. As usual, the ADMI workshop encouraged and promoted theoretical and applied research and development, which aims at: – Exploitingagent-driven datamininganddemonstratinghowintelligentagent technology can contribute to critical data mining problems in theory and practice – Improving data mining-driven agents and showing how data mining can strengthen agent intelligence in research and practical applications – Exploring the integration of agents and data mining toward a super-intelligent information processing and systems – Identifying challenges and directions for future research on the synergy between agents and data mining ADMI 2009 featured two invited talks and twelve selected papers. The ?rst invited talk was on “Agents and Data Mining in Bioinformatics,” with the s- ond focusing on “Knowledge-Based Reinforcement Learning.” The ten accepted papers are from seven countries. A majority of submissions came from Eu- pean countries, indicating the boom of ADMI research in Europe. In addition the two invited papers, addressed fundamental issues related to agent-driven data mining, data mining-driven agents, and agent mining applications. The proceedings of the ADMI workshops will be published as part of the LNAIseriesbySpringer. WeappreciatethesupportofSpringer, andinparticular Alfred Hofmann.

Sharkey examines the history of the Anglo-Egyptian Sudan (1898-1956) and the Republic of Sudan that followed in order to understand how colonialism worked on the ground, affected local cultures, influenced the rise of nationalism, and shaped the postcolonial nation state.

While the role the United States played in France's liberation from Nazi Germany is widely celebrated, it is less well known that American Jewish individuals and organizations mobilized to reconstruct Jewish life in France after the Holocaust. In A "Jewish Marshall Plan," Laura Hobson Faure explores how American Jews committed themselves and hundreds of millions of dollars to bring much needed aid to their French coreligionists. Hobson Faure sheds light on American Jewish chaplains, members of the Armed Forces, and those involved with Jewish philanthropic organizations who sought out Jewish survivors and became deeply entangled with the communities they helped to rebuild. While well intentioned, their actions did not always meet the needs and desires of the French Jews. A "Jewish Marshall Plan" examines the complex interactions, exchanges, and solidarities created between American and French Jews following the Holocaust. Challenging the assumption that French Jews were passive recipients of aid, this work reveals their work as active partners who negotiated their own role in the reconstruction process.

When we consider modern American animal advocacy, we often think of veganism, no-kill shelters, Internet campaigns against trophy hunting, or celebrities declaring that they would "rather go naked" than wear fur. Contemporary critics readily dismiss animal protectionism as a modern secular movement that privileges animals over people. Yet the movement's roots are deeply tied to the nation's history of religious revivalism and social reform. In The Gospel of Kindness, Janet M. Davis explores the broad cultural and social influence of the American animal welfare movement at home and overseas from the Second Great Awakening to the Second World War. Dedicated primarily to laboring animals at its inception in an animal-powered world, the movement eventually included virtually all areas of human and animal interaction. Embracing animals as brethren through biblical concepts of stewardship, a diverse coalition of temperance groups, teachers, Protestant missionaries, religious leaders, civil rights activists, policy makers, and anti-imperialists forged an expansive transnational "gospel of kindness," which defined animal mercy as a signature American value. Their interpretation of this "gospel" extended beyond the New Testament to preach kindness as a secular and spiritual truth. As a cultural product of antebellum revivalism, reform, and the rights revolution of the Civil War era, animal kindness became a barometer of free moral agency, higher civilization, and assimilation. Yet given the cultural, economic, racial, and ethnic diversity of the United States, its empire, and other countries of contact, standards of kindness and cruelty were culturally contingent and potentially controversial. Diverse constituents defended specific animal practices, such as cockfighting, bullfighting, songbird consumption, and kosher slaughter, as inviolate cultural traditions that reinforced their right to self-determination. Ultimately, American animal advocacy became a powerful humanitarian ideal, a touchstone of inclusion and national belonging at home and abroad that endures to this day.

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.
