## Automated Software

The PM shall also ensure that automated test processes, tools and/or environments are certified by the test community and the automated test process includes, to the greatest extent practicable, frequent and recurring tests that address cyber and software assurance considerations throughout the software lifecycle. The automated build scripts and test results shall be available to government testers, so they can reuse/recreate any test artifact.

Reduced testing time and manpower:  
Automated tests run significantly faster than manual tests, are less labor-intensive, and provide the capability to verify thousands to millions of test permutations in minutes to hours. For our DOD customers, this translates to accelerating the delivery of capability to the warfighter. Cost savings:  
Automation can markedly reduce the costs involved in producing first-rate software. Savings result from not only reduced test time and manpower but also from ...

plan, develop, build, test, release, deliver, deploy, operate, and monitor.

# Download File PDF Automated Software

In DevSecOps, testing and security are shifted to the left through automated unit, functional, integration, and security testing - this is a key DevSecOps differentiator since security and functional capabilities are tested and built simultaneously.

## ~~DoD Enterprise DevSecOps Reference Design~~

Automated testing is a key part of DevSecOps. It is enabled by multiple tools that measure both test code coverage and test results. They are fully automated and do not require human action. It also enables new concepts like pair programming and peer code review.
