The proper design of sewers and culverts requires consideration of the different, but interrelated, fields of hydrology, hydraulics, structural behavior, durability, economics and construction procedures. This Buried Fact reviews the structural behavior of flexible steel pipe and the development of design criteria and procedures.

Manufacturing Process ASTM A500 structural pipe is welded pipe sized tubing made from flat-rolled steel, formed through a roller system and welded using electric-resistance welding. Longitudinal butt joints of welded tubing shall be welded across its thickness in such a manner as to assure the structural design strength of the tubing section.
