~~"The most consistent and courageous-and unapologetic-liberal partisan in American journalism." -Michael Tomasky, New York Review of Books In this "clear, provocative" (Boston Globe) New York Times bestseller, Paul Krugman, today's most widely read economist, examines the past eighty years of American history, from the reforms that tamed the harsh inequality of the Gilded Age and the 1920s to the unraveling of that achievement and the reemergence of immense economic and political inequality since the 1970s. Seeking to understand both what happened to middle-class America and what it will take to achieve a "new New Deal," Krugman has created his finest book to date, a "stimulating manifesto" offering "a compelling historical defense of liberalism and a clarion call for Americans to retake control of their economic destiny" (Publishers Weekly). "As Democrats seek a rationale not merely for returning to power, but for fundamentally changing-or changing back-the relationship between America's government and its citizens, Mr. Krugman's arguments will prove vital in the months and years ahead." -Peter Beinart, New York Times~~

Both the real trade portion of the book and the monetary portion are divided into a core of chapters focused on theory, followed by chapters applying the theory major policy questions, past and current. International Economics presents an integrated treatment of Ricardian, specific factors, factor endowments, and imperfect competition models of trade, along with in-depth analysis of empirical evidence. It covers the effects and causes of trade policy, including strategic trade policy, focusing on the income-distribution effects of trade. The book provides a unified model of open-economy macroeconomics based on an asset-market approach to exchange rate determination with a central role for expectations. The new edition contains updated coverage of the euro and of the causes and likely effects of economic and monetary union (EMU) in Europe. It also features an up-to-date treatment of developing countries' experiences in an all-new Chapter 22. The chapter focuses on long-run income convergence, disinflation and exchange rate regimes, recent crises in Latin America, Russia, and Asia, and reform of the international financial "architecture."~~
