and equipment details for each specialization, so readers can make informed decisions and ask informed questions when encountering each field. The book provides insight on the latest technology and includes profiles of prolific designers, such as James Moody, Jeff Ravitz, Alan Adelman, and Paul Gregory. *Stage Lighting: Design Applications and More* is intended to help lighting designers translate their theatrical skills to other areas of lighting design, and provides guidance on how to take those initial steps into new ventures in their lighting careers.

The IES Lighting Handbook is an indispensable reference for anyone involved in lighting, including practitioners, designers, architects, and engineers. It is a compendium of what is known that directly relates to lighting and lighting design. This new edition provides a new illuminance determination procedure consisting of visual age-based illuminance ranges and mesopic adaptation. Much information is conveniently summarized in tabular format and exemplified with numerous four-color photographs and illustrations. There is in-depth coverage of sustainability practices: new chapters on daylighting, controls, sustainability, commissioning and energy management
