in a specified period: $GDP = \text{Consumption} + \text{Investment} + \text{Government Expenditure} + \text{Net Exports}$ (Exports - Imports).

The relationship between inflation and economic growth ...

Economic growth and low inflation It is possible that we can have economic growth without causing inflation. If growth is caused by increased productivity and investment, then the productive capacity of the economy can increase at the same rate as aggregate demand (AD). This enables economic growth without inflation.

Conflict between economic growth and inflation - Economics ...

Inflation is not neutral, and in no case does it favor rapid economic growth. Higher inflation never leads to higher levels of income in the medium and long run, which is the time period they analyze.

Does Inflation Harm Economic Growth? | NBER

Over time, inflation increases your cost of living. If the inflation rate is high enough, it hurts the economy. The effect depends on the type of inflation. For example, walking inflation is 3% to 10% per year. 1 It heats up economic growth too fast.

Inflation's Effect on the Economy and You
