Contains over 1,300 questions and answers. Integrated with Jeppesen's Helicopter Maintenance textbook.

The most current aviation maintenance technician general textbook available. Written to the new FAR part 147 standards. Expanded to include a complete section on electrical generators and motors, new hardware, and nonmetallic components. Many new tables, charts, and illustrations, including: abrasives, corrosion removal and treatment, corrosion points, helicopter weight and balance, and others. The 2004 revision includes additional metric hardware nomenclature and electronic tools, including internet research applications.

Possibly the most complete book written to date on helicopters and helicopter flying. Covers subjects not covered by other manuals such as turbine engines, performance, flight manuals, automatic flight controls, legal aspects, introductory stability and control and multi-engine helicopters.

Handy toolbox-size reference for professionals and hobbyists. Nonabrasive spiral-bound book provides conversions, formulas, densities, solid state electronics, and more.

The official FAA guide to maintenance methods, techniques, and practices essential for all pilots and aircraft maintenance...
