Factory back on the road. Japanese motorcycles have been the best-selling bikes in the world since the mid-1960s, driven by the "big four": Honda, Yamaha, Suzuki, and Kawasaki. Of course certain bikes have always had a following - Honda CB750, 305 Hawk, CB400-4, Benly; Suzuki GT750, Katana, GS1000S; Yamaha XS650, RD400 Daytona, TZ; Kawasaki H1, H2, Z1R - and these have now become the blue-chip Japanese bikes leading collectors to seek out more common (and now more affordable) alternatives. This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.

The fifth edition of "Numerical Methods

for Engineers" continues its tradition of excellence. Instructors love this text because it is a comprehensive text that is easy to teach from. Students love it because it is written for them--with great pedagogy and clear explanations and examples throughout. The text features a broad array of applications, including all engineering disciplines. The revision retains the successful pedagogy of the prior editions. Chapra and Canale's unique approach opens each part of the text with sections called Motivation, Mathematical Background, and Orientation, preparing the student for what is to come in a motivating and engaging manner. Each part closes with an Epilogue containing sections called Trade-Offs, Important Relationships and Formulas, and Advanced Methods and Additional References. Much more than a summary, the Epilogue deepens understanding of

Approximately 80% of the end-of-chapter problems are revised or new to this edition. The expanded breadth of engineering disciplines covered is especially evident in the problems, which now cover such areas as biotechnology and biomedical engineering. Users will find use of software packages, specifically MATLAB and Excel with VBA. This includes material on developing MATLAB m-files and VBA macros.

Discover concise keyword outlines of Biblical history in the strokes and symbols of ancient Chinese characters. Even though people in China and Japan may be tempted to think that Christianity is a ""Western"" religion, there is evidence that it is not as is seen within the Chinese characters they use everyday. If I were to

ask a Chinese or Japanese junior high school student how many people were on Noah's Ark and told them that the answer can be found in the word for "ship," they would know the answer. But if I asked a Westerner the same question, would they know that the answer is eight? In this book we will take a look at the gospel message embedded in the symbols of the Chinese characters that the Japanese use in the verse in Matthew 11:28, "Come to Me, all who are weary and heavy burdened, and I will give you rest."
