Ash Peterson falls for her the moment he lays eyes on her. She's a stereotypical city girl, from her manicure to her high heels. Judging by the sparks that fly between them, he knows there's a fire burning deep inside the blue-eyed beauty. But department store manager Juliana Meyers is thrown by her attraction to Ash. Everything about this quintessential cowboy sets her on edge, from his Stetson and mutton chop sideburns down to his dusty boots and spurs. All he's gotta do is walk into a room with those damn things jingling and she's putty in his hands. When Ash unintentionally injures Juliana, he feels that it's his responsibility to look after the hoity-toity redheaded workaholic. He pushes her to reexamine her perfectionist lifestyle, but it's hard for Juliana because she's used to doing things her way. Can she learn to relax and let

This book brings together research working at the boundary between design knowledges and mobilities, offering a novel collection for both theorists and practitioners. Drawing upon detailed case studies, it demonstrates the diverse roles of design in shaping mobility at different spaces and scales: across cities; within different types of buildings and infrastructures; and through commuting, work and leisure activities. A range of international scholars illustrate the designed mobilities of car parks, traffic lights, street benches, pedestrian wayfinding systems and accessible design in the urban environment; they examine spaces within hospitals, airports and train stations and investigate design practices for

bicycles, future urban vehicles and MotoGP motorcycle racing. Other contributions explore overlooked mobile artefacts such as television and video game remote controls, 3D printing and the types of packaging which enable objects themselves to move around. This book demonstrates how the tools, assumptions and processes of design shape spaces of mobility, and also illuminates how shifts in the fluidity and circulation of people, practices and materials in turn reconfigure practices of design. Mobilising Design develops multi-disciplinary understandings of design, drawing upon diverse literatures including design history, product design, architecture and cultural geography. By highlighting often invisible artefacts and associated knowledges and controversies, the book foregrounds the taken-for-granted

ways in which everyday mobility is designed. It will be of interest to scholars in geography, sociology, economic history, architecture, design and urban theory.

The Fountas & Pinnell Prompting Guide 2, for Comprehension: Thinking, Talking, and Writing contains precise language to use when teaching, prompting for, and reinforcing effective strategic actions in reading and writing. Classroom teachers, reading specialists, literacy teachers, and literacy coaches can use the flip chart as a ready reference while working with students in several instructional setting and contexts. Fountas and Pinnell provide language for teaching readers how to focus or expand their thinking through talk and writing before, during, and after reading. The goal is to help students think in three broad ways. 1. Thinking Within the Text Noticing and using the information that is directly stated in the text 2. Thinking Beyond the Text Noticing
