Prof. Kaplan brings a refreshing approach to data and statistics by first laying a foundation for statistical modeling. The goal of modeling is immediately apparent to students: reliable answers and useful predictions. Prof. Kaplan's approach reveals that modeling data can be positively good when done properly.

Fresh Approach came out in 2009. That edition included add-in software for R that provided several custom features that made it easier to work with R for introductory students. Probably the most famous component of that software is the `do()` function. But there are others, such as `rand()` and `resample()`.
