ABAP Quick Reference. This is the first of two posts, providing a quick reference for ABAP developers. It primarily consists of code examples and doesn't include major object oriented programming features, introduced in newer language versions. The second part of this series, targeting OOP related topics, can be found here: ABAP Objects Quick Reference.

For all the other environments than AS ABAP for Cloud Development, the now shipping release ABAP 7.50 was created as a copy of ABAP 7.62 based on Kernel 7.45. For these environments, as e.g. SAP S/4HANA or SAP NetWeaver 7.5 standalone, ABAP 7.50 is simply the direct successor of ABAP 7.40 and provides the ABAP Language and Runtime Environment for AS ABAP for NetWeaver 7.5.
