Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

A New Yorker and Fortune Best Book of the Year "A must-read for all Americans who want to remain the ones deciding what they can read, watch, and listen to." -Arianna Huffington Analyzing the strategic maneuvers of today's great information powers—Apple, Google, and an eerily resurgent AT&T—Tim Wu uncovers a time-honored pattern in which invention begets industry and industry begets empire. It is easy to forget that every development in the history of the American information industry—from the telephone to radio to film—once existed in an open and chaotic marketplace inhabited by entrepreneurs and

utopians, just as the Internet does today. Each of these, however, grew to be dominated by a monopolist or cartel. In this pathbreaking book, Tim Wu asks: will the Internet follow the same fate? Could the Web—the entire flow of American information—come to be ruled by a corporate leviathan in possession of "the master switch"? Here, Tim Wu shows how a battle royale for the Internet's future is brewing, and this is one war we dare not tune out.

In lives filled with passion and temptation, five young people experience the many forms of love. Achieving their wildest dreams takes everything they have, and soon their romances, friendships, and dearest personal values are tested. Along the way, their lives intertwine in surprising ways—on the lush soccer fields of college campuses in California and the glamorous fashion runways and football pitches of Italy and France. The brilliant and beautiful Sallie is embarking on an exciting international modeling career, but, so far from home, she runs the risk of getting lost in more ways than one. Her college sweetheart, Marco, is focused on his goal of becoming a professional soccer player and relies on the expert advice of his mentor, Lorenzo. But Lorenzo must figure out his own way to stay on top. Meanwhile, their athletic friend Dave has already hit rock bottom, attracting the empathy of nursing student Autumn. She'll do anything she can to help Dave, despite the risk of getting dragged down with him. Boundaries exist in the game of soccer, but in life they are all too easily crossed. Before long these five friends will learn exactly how far relationships can bend before they break.

It is an adaptation of the age-old Biblical tale of David and Goliath and opens the door for discussions on self-confidence and faith in the face of great obstacles. It is also an excellent book for schools, day cares and Sunday Schools. It is simple, inviting story, and is widely available in print and e-book for easy access.

Fashion law encompasses a wide variety of issues that concern an article of clothing or a fashion accessory, starting from the moment they are designed and following them through distribution and marketing phases, all the way until they reach the end-user. Contract law, intellectual property, company law, tax law, international trade, and customs law are of fundamental importance in defining this new field of law that is gradually taking shape. This volume focuses on the new frontiers of fashion law, taking into account the various fields that have recently emerged as being of great interest for the entire fashion world: from sustainable fashion to wearable technologies, from new remedies to cultural appropriation to the regulation of model weight, from advertising law on the digital market to the impact of new technologies on product distribution. The purpose is to stimulate discussion on contemporary problems that have the potential to define new boundaries of fashion law, such as the impact of the heightened ethical sensitivity of consumers (who increasingly require effective solutions), that a comparative law perspective

renders more interesting. The volume seeks to sketch out the new legal fields in which the fashion industry is getting involved, identifying the new boundaries of fashion law that existing literature has not dealt with in a comprehensive manner.

The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!

NYTBR Paperback Row Selection An investigation into the damage wrought by the colossal clothing industry and the grassroots, high-tech, international movement fighting to reform it What should I wear? It's one of the fundamental questions we ask ourselves every day. More than ever, we are told it should be something new. Today, the clothing industry churns out 80 billion garments a year and employs every sixth person on Earth. Historically, the apparel trade has exploited labor, the environment, and intellectual property--and in the last three decades, with the simultaneous unfurling of fast fashion, globalization, and the tech revolution, those abuses have multiplied exponentially, primarily out of view. We are in dire need of an entirely new human-scale model. Bestselling journalist Dana Thomas has traveled the globe to discover the visionary designers and companies who are propelling the industry toward that more positive future by reclaiming traditional craft and launching cutting-edge sustainable technologies to produce better fashion. In Fashionopolis, Thomas sees renewal in a host of developments, including printing 3-D clothes, clean denim processing, smart manufacturing, hyperlocalism, fabric recycling--even lab-grown materials. From small-town makers and Silicon Valley whizzes to such household names as Stella McCartney, Levi's, and Rent the Runway, Thomas highlights the companies big and small that are leading the crusade. We all have been casual about our clothes. It's time to get dressed with intention. Fashionopolis is the first comprehensive look at how to start.

Leaving full-time employment to enter retirement often requires a 180-degree change--in mindset and behavior--from the way you managed your time and money previously. This is especially true for Baby Boomers who may have never experienced adult life without a full-time job and have been practicing the same habits since their 20s. These life transitions can be looked at as if they require "flipping a switch." Some changes happen suddenly like an on/off switch, while others happen over time like a "dimmer switch". Some "switches" are

voluntary like spending accumulated savings, while some are mandatory like taking required minimum distributions starting at age 72. And to make matters more confusing, there are also lifestyle and social changes to consider as well. Flipping a Switch discusses 35 financial, lifestyle, and social transitions you'll encounter upon entering retirement, including:

- Full-time work to new pastimes
- Saving money to spending money
- Receiving a paycheck to creating a "paycheck"
- Funding retirement savings plans to taking required minimum distribution withdrawals
- Accumulating possessions to downsizing

Everyone has unique "switches" to flip. Flipping a Switch: Your Guide to Happiness and Financial Security in Later Life offers important information and guidance new retirees need before undertaking their new life. Each chapter includes a "How to Flip This Switch" section with suggested action steps. Nationally known speaker, author, and Certified Financial Planner® Dr. Barbara O'Neill will help you develop a plan to become your best future self.
