This volume ties together the histories of Japan and China for the modern period prior to the 20th century. The chapters look at Chinese and Japanese works which were written in response to events in the other country. None of these works has received any sustained attention in the west. As a result we get a view of how Chinese and Japanese saw each other at a time when there were few personal contacts allowed. Many of these texts were built on fanciful embellishments of stories that migrated from one land to the other. But the unique qualities of the Sino-Japanese cultural bond seem to have conditioned the interaction so that these texts all reveal a fascinatingly well-defined area.

Germany and Japan are two of the worldwide leading countries in robotics research. Robotics as a key technology introduces technical as well as philosophical and cultural challenges. How can we use robots that have a human-like appearance in everyday life? Are there limits to technology? What are the cultural similarities and differences between Germany and Japan? These are some of the questions which are discussed in the book. Five chapters comprehend an intercultural and interdisciplinary framework including current research fields like Roboethics, Hermeneutics of Technologies, Technology Assessment, Robotics in Japanese Popular Culture and Music Robots. Contributions on cultural interrelations, technical visions and essays round out the content of this book.

The Japanese media system is in a state of flux as a result of shifts in the digital economy, new audience metrics and declining print and broadcast revenues. This volume examines issues of media consolidation, participatory culture and franchising in contemporary Japan, and explores how the Japanese media system is adapting to change in light of its tendency toward prioritizing domestic markets, restricting access and co-opting fan movements. The chapters consider conflict and negotiations within the Japanese media system, structural transformations, emerging modes of producer and audience

relations and potential sites of innovation.

Annotation. This study of the social circumstances of Japanese intellectuals in the last quarter of the eighteenth century is based on biographical data concerning 173 individuals. It deals with the image of intellectual life of that period in current scholarship, and with the self-image and ethos of scholars, authors, poets and artists. That self-image and ethos, however, often clash with the realities of their everyday lives. This prosopographical investigation offers a new look at intellectual life on a basic level. The current image of intellectual life in the Tokugawa period is one of dissatisfaction and withdrawal, whereas the image that results from this study is one of dynamism and interaction. Although, the first edition had a similar focus, more than five years have passed since its publication and the biological and social circumstances of the lake have drastically changed due to, for example, the further expansion of alien species, the decrease of indigenous species, the progress of integrated watershed management by the Union of the Kansai Government which was established in 2010, the legislation of the Conservation and Restoration Act of Lake Biwa in 2015 and more. The new edition will therefore feature updated and new information on the above and more topics as well as updated and revised data based on the latest research. Inventories of respective taxa, especially those of small animals, are also revised based on the latest studies. Furthermore, this volume covers the characteristics of the biota of this ancient lake, but at the same time, it will also approach it as a 'culture ancient lake'. Other topics also include water pollution, lakeshore development, the effects of global warming in the past and present, the influence of people, and countermeasures by local and national governments. Moreover, the volume also provides a comprehensive view on the future of Lake Biwa and that of its residents. Miraculously enough, this ancient lake has kept its water quality clear even until today despite the fact of more than 1.4 million people living on its shores. Finally, the book also gives indispensable information to those engaged in improving and conserving water regimes of lakes and other water bodies all over the world and to those interested in the culture and history of Japan. Lake Biwa is not only one of the rarest ancient lakes of the world, but the people's involvement with the lake also goes back a long way. This is shown in the diverse culture developed in this area and in the various archaeological finds that date back as early as the Jomon Period, nearly 10.000 years ago. Today Lake Biwa fulfills an important role as a water resource by providing domestic, commercial, industrial, and agricultural water for over 14 million residents living around the Lake Biwa-Yodo River drainage basin. This updated volume focuses on the geological and biological features of the lake as well as on the long-term interactions between the people and the lake.

Every serious student of Japanese needs a reliable and user-friendly dictionary in their collection.
